EXECUTIVE SUMMARY

Remedial or developmental courses are designed to help students remediate lost skills or to develop skills that they may never have had the opportunity to learn. Students in remedial courses at the UCCSN are a mix of recent high school graduates and older returning or first-time students. This report focuses on remedial enrollments of recent Nevada high school graduates, which are defined as students who graduated from a Nevada high school between September 2002 and August 2003.

The Board of Regents mandates testing for all students to determine their placement in English courses. Students must achieve a certain score in order to enroll in English 101; otherwise, they must enroll in a remedial English course. Placement in remedial mathematics is not mandated by the Board; however, all institutions test students for placement in mathematics courses.

Of the 2,751 recent Nevada high school graduates enrolled in remedial courses in Fall or Summer 2003, only 806 or 29 percent took both remedial math and English. Most students, 71 percent, needed remediation in only one subject area. Approximately 38.5 percent of all recent Nevada high school graduates who attended UCCSN were enrolled in at least one remedial course. The percentage of recent high school graduates enrolled in remedial courses remained essentially unchanged from the prior year. In 2000, 30.7 percent of recent Nevada high school graduates enrolled in remediation, in 2001 and 2002 that increased to 36.1 and 38.4 percent, respectively.

This percent of remedial students varied somewhat from the universities to the community colleges. At the universities, 35 percent of recent Nevada high school graduates enrolled in remediation, as did 43 percent at the community colleges. The Nevada State College enrolled 33 percent of its recent Nevada high school graduates in remediation, down considerably from 57 percent in the college's founding year.

For recent high school graduates the most obvious reason for placement in remedial courses is due to the course-taking pattern in high school, often compounded by low academic performance in high school as demonstrated by GPA. Many students do not decide to attend our colleges and universities until their senior year, and then it is too late to make up for poor course selection. National data clearly demonstrate that enrollment in science and math courses, as well as rigorous humanities and language courses, throughout high school make a difference in a student's success in college.

INTENTIONALLY BLANK PAGE

INTRODUCTION

In 1997, the Nevada Legislature approved Senate Bill 482 (Chapter 473, *Statutes of Nevada 1997*) directing the University and Community College System of Nevada (UCCSN) to provide certain information to Nevada school districts on enrollments in remedial courses within the UCCSN and the costs associated with providing that instruction. Codified in *Nevada Revised Statutes* (NRS) 396.548, the mandate provides the following:

The board of regents shall require employees of the System to provide to the board of trustees of each school district of this state, as appropriate, information regarding the:

- 1. Number of pupils who graduated from a high school in the district in the immediately preceding year and enrolled in remedial courses in reading, writing or mathematics at a university or community college within the system.*
- 2. Costs incurred by the System in providing remedial instruction pursuant to subsection 1.*

The data necessary to satisfy this requirement are collected from the institutions of the UCCSN and are summarized in this report. The information is provided to both the school districts and to the individual secondary schools, as appropriate, along with information regarding the placement methods utilized by the institutions of the UCCSN.

This report includes information on students who graduated from a Nevada high school between September 2002 and August 2003 (“recent high school graduates”) and who enrolled in at least one remedial course at a UCCSN institution in Summer or Fall 2003. The report excludes any data for which a positive match to a Nevada high school could not be made. Besides these recent high school graduates, there are a number of other students who require remediation in order to participate in college-level courses. The UCCSN institutions enroll a significant number of these older, returning students in addition to the recent high school graduates. In placing students in remedial courses, each institution is subject to Board policy as well as institution-specific internal policies on remediation.

For this report, the cost of providing remedial instruction is calculated at a per-credit cost for community colleges (\$204.57) and a higher per-credit cost for the state college (\$296.69) and universities (\$309.22) to reflect the actual differential that exists. Cost calculations are determined based on the state supported Operating Budget and projected FTE for each institution.

It should be noted that the terminology used to describe these enrollments varies. The UCCSN Board of Regents Handbook uses the term “developmental” to describe courses designed for students who are deficient in the general competencies necessary for a regular postsecondary curriculum and educational setting, while the wording of NRS 396.548 uses the term “remedial.” We recognize that these terms have different meanings among people who work in this area; however, within the context of this report, these terms are used interchangeably.

POLICIES ON STUDENT PLACEMENT IN REMEDIAL COURSES

The Board of Regents of the University and Community College System of Nevada has approved a policy for placement of students into appropriate English courses. All UCCSN institutions utilize the following guidelines in placing students in English courses:

UCCSN Board of Regents' Handbook Policy on Student Placement in English Remedial Courses

Title 4, Chapter 16

- II. *Placement in English 101 in the University and Community College System of Nevada will be based upon an enhanced ACT English score of 21 (21-29), a recentered SAT Verbal score of 510 (510-670), a TSWE score of 44 (44-59), or equivalent criteria through formal assessment of students.*

Test Scores to Be Used

<i>English Course</i>	<i>Enhanced ACT English</i>	<i>Recentered SAT Verbal</i>	<i>TSWE</i>
<i>English I, A Developmental English</i>	<i>1-20</i>	<i>200-500</i>	<i>43 or less</i>
<i>English 101</i>	<i>21-29</i>	<i>510-670</i>	<i>44-59</i>
<i>English 102</i>	<i>30-36</i>	<i>680-800</i>	<i>60 or more</i>

In the event that ACT or SAT scores are not available, the institutions use alternate methods to place students in English courses.

There is no uniform Board of Regents' policy for placing students in remedial math courses. The UCCSN institutions utilize various assessment tests for placing students in remedial mathematics courses. The following section summarized the campus-specific policies used for English and math placement.

UCCSN Institutional Placement Policies

Policies on the placement of students in remedial courses may vary by institution. Each institution's placement policy is summarized below.

Institution	Remedial Courses	Placement Method(s)
UNR	<u>ENGLISH</u> English 1	<ul style="list-style-type: none"> Enhanced ACT English score < 21 SAT Verbal score < 510 ACT score < 21
	<u>MATH</u> Math 1	<ul style="list-style-type: none"> ACT Math score < 21 SAT Math score < 500
UNLV	<u>ENGLISH</u> English A	<ul style="list-style-type: none"> Enhanced ACT English score < 21 SAT Verbal score < 510
	<u>MATH</u> Math 095	<ul style="list-style-type: none"> ACT score < 20 SAT score < 500
	Math 096	<ul style="list-style-type: none"> ACT score 20-21 SAT score 500-519
NSC	<u>ENGLISH</u>	Written English placement exam is given to students with an ACT score > 21 in English or SAT < 554 in English and to students who have not taken the ACT or SAT. Ratings < 2 are referred to a community college (ratings are from 1 to 4). NSC offers English 100 (5 credits) in lieu of remedial English. See discussion on pages 11-12.
	<u>MATH</u> Math 093 Math 095 Math 096	Math Placement Test score > 9 Math Placement Test score 10-14 Math Placement Test score 15-17

TRENDS IN REMEDIAL ENROLLMENT

Following are a number of graphs that illustrate the growth in enrollment of recent Nevada high school graduates in remedial/developmental English and/or math courses from 2000 to 2003. It is important to note that the figures supporting the graphs are for recent high school graduates only (students that graduated between September and August of the year immediately preceding their enrollment at a UCCSN institution). This report does not focus on the number of other students who require or elect remediation but who do not fall into the category of “recent Nevada high school graduate.”

Of the 2,751 recent Nevada high school graduates enrolled in remedial courses in Fall or Summer 2003, only 806 or 29 percent took both remedial math and English. Most students, 71 percent, needed remediation in only one subject area. Approximately 38.5 percent of all recent Nevada high school graduates who attended UCCSN were enrolled in at least one remedial course. The percentage of recent high school graduates enrolled in remedial courses remained essentially unchanged from the prior year. In 2000, 30.7 percent of recent Nevada high school graduates enrolled in remediation, in 2001 and 2002 that increased to 36.1 and 38.4 percent, respectively.

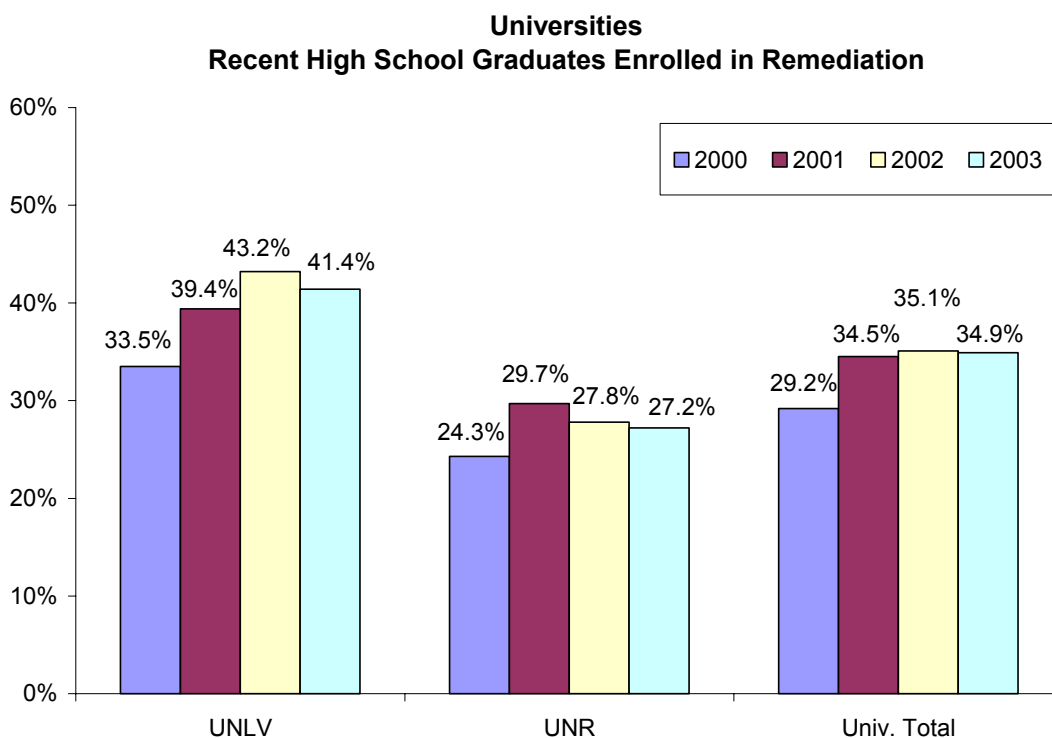

For recent high school graduates, the most obvious reason for placement in remedial courses is due to the course-taking patterns in high school, often compounded by low academic performance in high school, as demonstrated by grade point average (GPA). Many students do not decide to attend our colleges and universities until their senior year of high school, and then

it is too late to make up for poor course selection. National data clearly demonstrate that enrollment in science and math courses, as well as rigorous humanities and language courses, throughout high school make a difference.

Following is a review of remedial enrollment trends at the universities, state college and community colleges of the UCCSN.

Universities

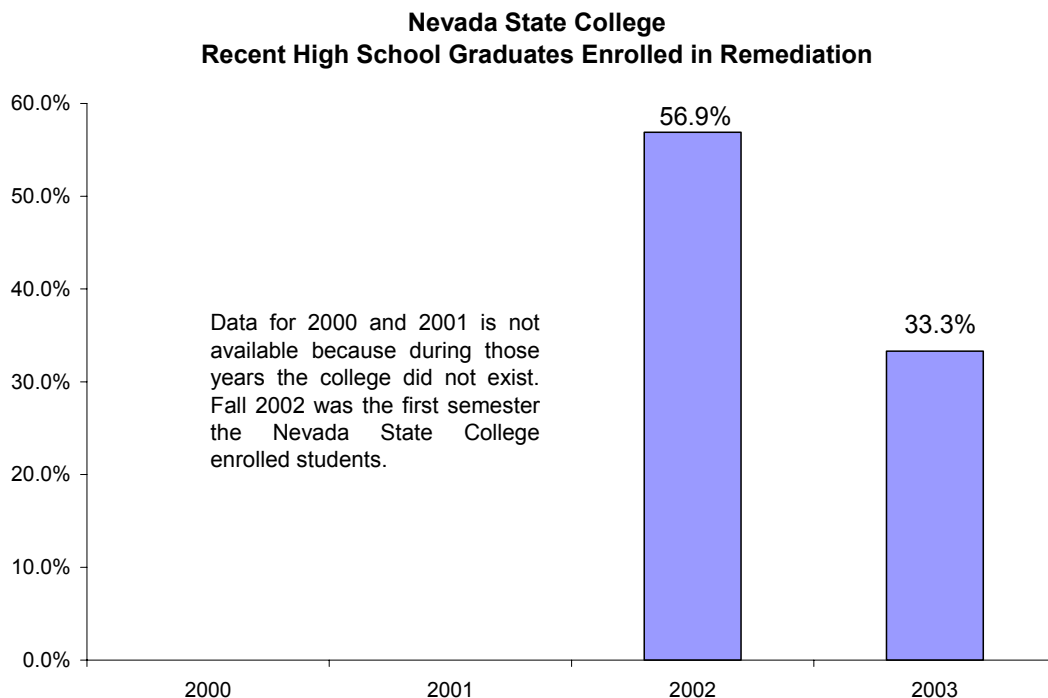

The enrollment of recent Nevada high school graduates in remediation at the universities generally increased between 2000 and 2002; however, it declined slightly. Remedial enrollment at UNLV has steadily increased from 33.5 percent in 2000 to 43.2 percent in 2002, declining in 2003 to 41.4 percent. Remedial enrollment at UNR grew from 24.3 percent in 2000 to 27.8 percent in 2002, dropping off to 27.2 percent in 2003. Overall, remedial enrollment at the universities increased from 29.2 percent in 2000 to 34.9 percent in 2003. The following graph illustrates this growth in remedial enrollment at the universities.

State College

As the Nevada State College first opened its doors in Fall 2002, trend data is not available prior to that semester. However, for the Fall 2002, 56.9 percent of the school's recent Nevada high school graduates enrolled in remedial math. The NSC does not offer remedial English; therefore, all data provided by the College for this report is with respect to remediation in math only. In 2003, 33.3 percent of the recent Nevada high school graduates attending NSC enrolled in a remedial math course.

In lieu of remedial English courses, NSC offers a 5-credit, college-level composition course. The College uses CCSN's diagnostic essay tests to place English students. Those students who would have been placed in CCSN's English 095 and English 098 are offered the opportunity to take NSC's English 100. In addition, students who might place into English 101, but would like extra practice and attention that the additional two hours of class a week provide may also take the course. Successful completion (grade C or higher) of the course allows a student to place directly into English 102. The successful completion of the final assignment is judged according to the guidelines set by the UNLV Department of English. The course has been articulated with UNLV so that students who successfully complete English 100 at NSC may enter English 102 at UNLV. Students who do not successfully complete the course must take English 101, before taking English 102.

Community Colleges

In general, enrollment of recent Nevada high school graduates in remediation at community colleges continues to increase overall, but at certain institutions we are seeing a decline in

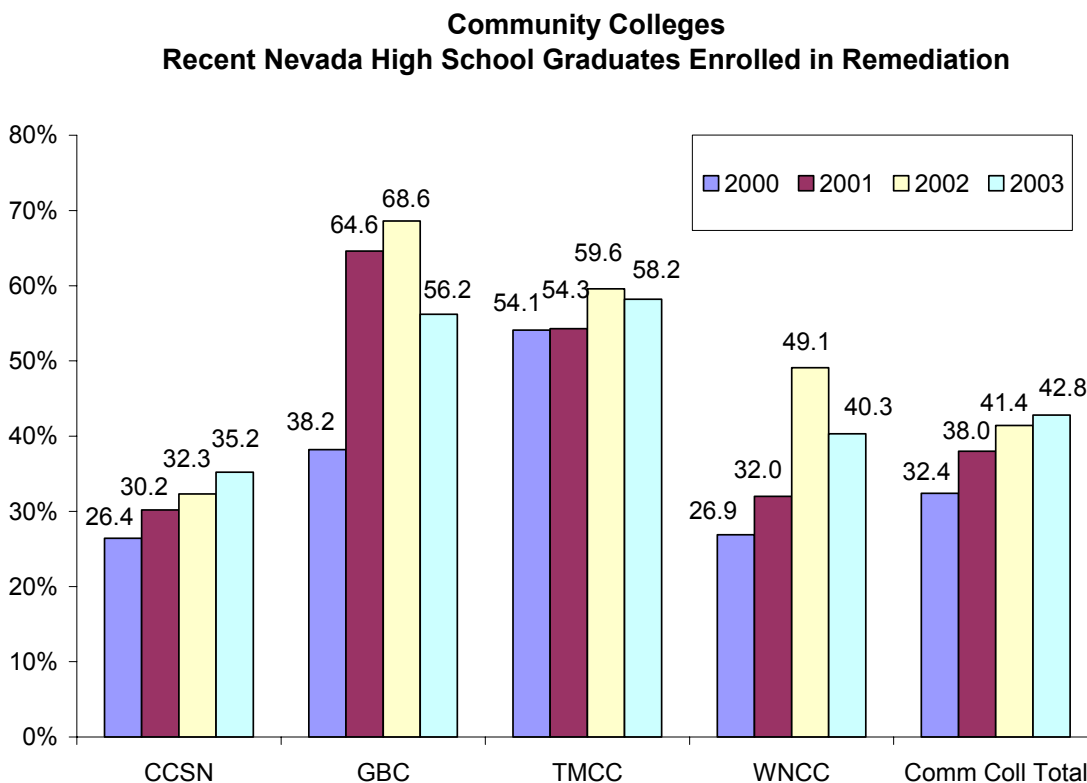

remedial enrollments. Overall the percent of recent high school graduates enrolled in remediation increased from 32.4 percent in 2000 to 42.8 percent in 2003.

The CCSN saw its remedial enrollment increase from 26.4 percent in 2000 to 35.2 percent in 2003. The greatest growth in remedial enrollment occurred at GBC where the percent increased from 38.2 percent in 2000 to 56.2 percent in 2003. However, the 56.2 percent of recent high school graduates enrolled in remediation at GBC is down from 2002 when the college's remedial enrollment peaked at 68.6 percent.

Remedial enrollment at TMCC has not dropped below 50 percent since the first year remedial data was collected in 1999 when 49.1 percent of the College's recent high school graduates enrolled in developmental courses. The percents increased to 54.1 percent in 2000, 54.3 percent in 2001, 59.6 percent in 2002, and most recently it declined slightly to 58.2 percent in 2003.

Finally, WNCC witnessed its remedial enrollment drop considerably from 49.1% in 2002 to 40.3 percent in 2003. The college saw its lowest enrollment percent in 2000 when 26.9 percent of recent high school graduates attending WNCC enrolled in remedial courses.

The following graph depicts the growth in remedial enrollment across the community college campuses.

CONCLUSIONS: HOW TO SUCCEED IN COLLEGE

The Board of Regents mandated that each UCCSN campus work vigorously with each of its feeder high schools to identify the reasons for placement of recent high school graduates in remedial courses. In addition, the Board urged that the following actions be taken: 1) share with high school faculty information about the material on placement tests, 2) conduct discipline meetings with college/university faculty and high school faculty to discuss ways to improve student achievement, and 3) conduct early testing of high school students so that they can take courses in high school to prepare them for introductory level courses.

The Board supports college classes offered to students in high schools, particularly mathematics and English. This means early testing and early identification of deficits. Further, the Board supports college/high school partnerships, including high schools on the campus at TMCC and CCSN, and the high tech centers where students can start college work early, often supported by their school district.

In many ways, the fundamental question is “what can we do to reduce the number of students graduating from our high schools and then taking remedial courses at the UCCSN?” It is clear that a successful approach to this issue requires the cooperative efforts of higher education, elementary and secondary education, and the support of the Governor and the Legislature.

Working towards solving this problem, Nevada is one of five states participating in the American Diploma Project, an effort to help certain states strengthen their ongoing standards-based reform efforts and analyze whether they have set the bar for high school graduation requirements in reading, writing and mathematics in the right place. In addition, the UCCSN is an active participant in the GEAR UP program whose mission is to significantly increase the number of low-income students who are prepared to enter and succeed in postsecondary education.

However, the research and data are quite clear on what factors significantly contribute to a student’s success in college. A major national study¹ shows that a student's "academic resources" are critically important in determining academic success. This vital element is “a composite measure of the academic content and performance the student brings forward from secondary school into higher education. This measure is dominated by the intensity and quality of secondary school curriculum, overwhelming all other demographic variables in predicting college success, including those of gender, race and socio-economic status. Further, the study finds that "of all pre-college curricula, the highest level of mathematics one studies in secondary school has the strongest continuing influence on bachelor's degree completion."

¹ Adelman, Clifford. 1999. *Answers in the Tool Box: Academic Intensity, Attendance Patterns, and Bachelor's Degree Attainment*. Washington DC: U. S. Department of Education.

National data from ACT also point at the critical importance of a strong preparatory program in high school. The UCCSN's cutoff score for placement in remedial English is an ACT score of 21. Nevada high school graduates who take the ACT test and complete ACT's core curriculum score above 21 in all areas of the test (English, Mathematics, Reading, and Science). Nevada high school graduates who take the ACT test, but do not complete ACT's core curriculum, score below 21 in all areas of the test.
